Service Information	30

To help you make the best use of your cooker, PLEASE READ THIS BOOKLET CAREFULLY.

Your new cooker is guaranteed and will give lasting service. The guarantee is only applicable if the cooker has been installed in accordance with the Installation Instructions.

The cooker is designed specifically for domestic use and responsibility will not be accepted for use in any other installation.

When first using the cooker ensure that the room is well ventilated (e.g. open a window or use an extractor fan) and that persons who may be sensitive to the odour avoid any fumes. It is suggested that any pets be removed from the room until the smell has ceased. This odour is due to any temporary finish and also any moisture absorbed by the insulation.

Our policy is one of continual improvement in design and development, therefore strict accuracy of illustrations and descriptions cannot be guaranteed.

**This appliance conforms with the following European Economic Community directives:**

- 2006/95/EC of 12/12/06 (Low Voltage) and subsequent modifications;
- 2004/108/EC of 15/12/04 (Electromagnetic Compatibility) and subsequent modifications;
- 90/396/EEC of 29/06/90 (Gas) and subsequent modifications (only for models which use gas);
- 93/68/EEC of 22/07/93 and subsequent modifications.
- 2002/96/EC

# WARNING

**WARNING:** The appliance and its accessible parts become hot during use.

Care should be taken to avoid touching heating elements. Children less than 8 years of age shall be kept away unless continuously supervised.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

**WARNING:** Unattended cooking on a hob with fat or oil can be dangerous and may result in fire.

**NEVER** try to extinguish a fire with water, but switch off the appliance and then cover flame e.g. with a lid or a fire blanket.

Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.

The internal surfaces of the compartment (where present) may become hot.

Never use steam cleaners or pressure cleaners on the appliance. Remove any liquid from the lid before opening it.

Do not close the glass cover (if present) when the gas burners or electric hotplates are still hot.

**WARNING:** Ensure that the appliance is switched off before replacing the lamp to avoid the possibility of electric shock.

**CAUTION:** the use of inappropriate hob guards can cause accidents.

## NOTICE

**! VERY HOT SURFACES**

FOOD OR GREASE ON THESE SURFACES COULD CAUSE SMOKE AND POSSIBLY EVEN BURN  
YOU MUST KEEP THE OVEN AND GRILL CAVITIES CLEAN

**! ATTENTION**

DURING INSTALLATION THE FEET OF THE APPLIANCE MUST BE LOWERED SO THAT AN AIR GAP OF AT LEAST 10MM (1CM) IS LEFT BETWEEN THE BASE OF THE APPLIANCE AND THE FLOOR.

**! ATTENTION**

WHEN USING THE MAIN OVEN YOU MUST ENSURE THAT THE BASE OF THE CAVITY IS NOT COVERED WITH ALUMINUM FOIL, UTENSIL OR ANY OTHER FORM OF COVERING. FAILURE TO DO THIS MAY RESULT IN THE CAVITY BEING DAMAGED.

---

# FOR YOUR SAFETY

---

**Please read the precautions below before using your cooker.**

## **ALWAYS . . .**

- ALWAYS make sure you understand the controls before using the cooker.
- ALWAYS check that all controls on the cooker are turned off after use.
- ALWAYS stand back when opening an oven door to allow heat to disperse.
- ALWAYS use dry, good quality oven gloves when removing items from the ovens.
- ALWAYS take care when removing items from the top oven/grill when the main oven is on, as the contents may be hot.
- ALWAYS keep the oven and grill doors closed when the cooker is not in use.
- ALWAYS place pans centrally over the hotplate burners and position them so that the handles cannot accidentally be caught or knocked or become heated by other burners.
- ALWAYS keep the cooker clean, as a build up of grease or fat from cooking can cause a fire.
- ALWAYS allow the cooker to cool before cleaning.
- ALWAYS follow the basic principles of food handling and hygiene to prevent the possibility of bacterial growth.
- ALWAYS keep ventilation slots clear of obstructions.
- ALWAYS turn off the electricity supply before cleaning or replacing an oven lamp.
- ALWAYS refer servicing to CORGI registered appliance service engineers.

- **The appliance should not be operated by people (including children) with reduced physical, sensory or mental capacities, by inexperienced individuals or by anyone who is not familiar with the product. These individuals should, at the very least, be supervised by someone who assumes responsibility for their safety or receive preliminary instructions relating to the operation of the appliance.**
  
- **The appliance must be used by adults only for the preparation of food, in accordance with the instructions outlined in this booklet. Any other use of the appliance (e.g. for heating the room) constitutes improper use and is dangerous. The manufacturer may not be held liable for any damage resulting from improper, incorrect and unreasonable use of the appliance.**

---

# FOR YOUR SAFETY

---

## NEVER . . .

- NEVER leave children unsupervised where the cooker is installed as all surfaces will get hot during and after use.
- NEVER allow anyone to sit or stand on any part of the cooker.
- NEVER store items that children may attempt to reach above the cooker.
- NEVER heat up unopened food containers as pressure can build up causing the container to burst.
- NEVER store chemicals, food stuffs, pressurised containers in or on the cooker, or in cabinets immediately above or next to the cooker.
- NEVER fill a deep fat frying pan more than 1/3 full of oil, and never use a lid. **DO NOT LEAVE UNATTENDED WHILE COOKING.**
- NEVER place flammable or plastic items on or near the hotplate.
- NEVER use proprietary spillage collectors on the hotplate.
- NEVER use the cooker as a room heater.
- NEVER dry clothes or place other items over or near to the hotplate or oven/grill doors.
- NEVER wear garments with long flowing sleeves whilst cooking.

**NOTE:** The use of a gas cooking appliance results in the production of heat and moisture in the room in which it is installed. Always ensure that the kitchen is well ventilated; keep natural ventilation holes open or install a mechanical ventilation device (mechanical extractor hood).

In particular when using the grill or more than one hotplate burner, open a window if a mechanical ventilation device is not operating.

**!** The appliance should not be operated by people (including children) with reduced physical, sensory or mental capacities, by inexperienced individuals or by anyone who is not familiar with the product. These individuals should, at the very least, be supervised by someone who assumes responsibility for their safety or receive preliminary instructions relating to the operation of the appliance.

# INSTALLATION INSTRUCTIONS

Prior to installation, ensure that the local distribution conditions (nature of the gas and gas pressure) and the adjustment conditions are compatible. The adjustment conditions for this appliance are stated on the data badge which is fitted on the back panel.

This appliance is not designed to be connected to a combustion products evacuation device. It must be installed and connected in accordance with current installation regulations. Particular attention should be given to the relevant requirements regarding ventilation.

## **MODEL NUMBERS: CH60DHKFS;CH60DHSFS;CH60DHWFS**

### **Category II2H3+ (GB)**

These models are set to burn NATURAL GAS (G20) at 20 mbar but can be converted for use on BUTANE (G30) at 28-30mbar or PROPANE (G31) at 37mbar with the use of the LPG conversion kit that can be obtained free of charge, if you contact our Genuine Parts and Accessories department (see Key Contacts, back page).

## **GAS SAFETY (INSTALLATION & USE) REGULATIONS**

It is the law that all gas appliances are installed by competent persons in accordance with the current edition of the above regulations. It is in your interest and that of safety to ensure compliance with the law. In the UK, CORGI registered installers work to safe standards of practice. The cooker must also be installed in accordance with BS 6172. Failure to install the cooker correctly could invalidate the warranty liability claims and could lead to prosecution.

## **LOCATION**

The cooker may be located in a kitchen, kitchen/diner or a bed-sitting room, but not in a room containing a bath or shower. The cooker must not be installed in a bed-sitting room of less than 20m<sup>3</sup>.

When adjusted for use on Butane (G30) or Propane (G31), the cooker must not be installed in a room or internal space below ground level, e.g. in a basement.

## **PROVISION FOR VENTILATION**

The room containing the cooker should have an air supply in accordance with BS 5440: Part 2.

The room must have an opening window or equivalent; some rooms may also require a permanent vent. If the room has a volume between 5 and 10m<sup>3</sup>, it will require an air vent of 50cm<sup>2</sup> effective area unless it has a door which opens directly to outside. If the room has a volume of less than 5m<sup>3</sup>, it will require an air vent of 100cm<sup>2</sup> effective area. If there are other fuel burning appliances in the same room, BS 5440: Part 2 should be consulted to determine air vent requirements.

# INSTALLATION INSTRUCTIONS

## TECHNICAL DATA

Gas connection	Rp " ( BSP female)
Pressure test point	Front left hotplate injector
Gas rate adjustment	None
Aeration adjustment	None
Electrical connection	4mm <sup>2</sup> twin and earth 230/240V a.c. 50Hz. 20 A fuse.

	G20 at 20mbar		G30 at 28-30mbar G31 at 37mbar	
	HEAT INPUT	INJECTOR	HEAT INPUT	INJECTOR
<b>Burner</b>				
HOTPLATE Front Left and Rear Right	3.05 kW	116	3.0 kW (220g/h)	86
HOTPLATE Front Right and Rear Left	2.0 kW	103	2.0 kW (145g/h)	70
GRILL	2.2 / 2.4 kW			
MAIN OVEN	1.8 / 2.0 kW			
TOP OVEN	1.7 / 1.9 kW			

# INSTALLATION INSTRUCTIONS

## SPACE FOR FIXING

The cooker can be close fitted below hotplate level. This requires a minimum distance of 600mm between cupboard units of hotplate height.

When installing next to a tall cupboard, partition or wall, for a minimum distance of 400mm above hotplate level, allow a side clearance of at least 65mm.

The diagram below illustrates the minimum clearance between the cooker and adjacent walls, cupboards etc.

The wall behind the cooker, 50mm below and 450mm above, and the width of the cooker, must be a non-combustible material such as ceramic wall tiles.

If the cooker is to be fitted close to a corner on the left hand side, ensure that there is a clearance of at least 50mm to allow the main oven door to open fully for when removing oven shelves.

## COOKER HOODS

If a cooker hood is to be installed, refer to the cooker hood manufacturers' instructions regarding fixing height.

# INSTALLATION INSTRUCTIONS

## UNPACKING THE COOKER

Unpack the components from inside the grill and oven. Check that the following parts are present:

Grill pan and grid	Main oven shelves (2)
Top oven/grill shelf (1)	Pan supports
Baking dish	Enamelled burner caps (4)
Aluminium burner bodies (4)	Literature

## LEVELLING

Four skid feet are fitted which can be adjusted up or down to level the cooker.

## CONVERSION FOR USE ON BUTANE (G30) OR PROPANE (G31)

Each burner requires the injector to be replaced and bypass screws adjusted or replaced as follows:

1. Remove the loose hotplate burner parts.
2. Using a 7mm socket, replace the hotplate injectors as appropriate (see table on previous page).
3. Re-position the loose burner parts.
4. Carefully pull off the hotplate control knobs.
5. Using a narrow flat bladed screwdriver rotate the bypass screws fully clockwise. The hotplate tap bypass screws are located down the centre of the spindle.
6. Re-assemble the control panel parts.
7. Secure the self-adhesive LPG conversion label over the gas details on the data badge.

# INSTALLATION INSTRUCTIONS

## STABILITY CHAIN

A hole in the gas inlet valve bracket can be used to engage a stability chain.

## CONNECTING TO GAS SUPPLY

Connection to the cooker should be made with an approved appliance flexible connection to BS 669. A length of 0.9 to 1.25m is recommended. The length of hose chosen should be such that when the cooker is in situ, the hose does not touch the floor.

Those cookers converted to use on LPG should be connected with a hose suitable for LPG and capable of withstanding a pressure of 50 mbar.

An adaptor backplate should be fitted within the shaded area shown, to allow the cooker to be pushed fully to the wall and to ensure that the flexible hose is only likely to come into contact with areas at the rear of the cooker that do not exceed a temperature rise of 70°C.

# ELECTRICAL CONNECTION

## **WARNING - THIS APPLIANCE MUST BE EARTHED.**

The cooker must be connected by a qualified electrician to a suitable double - pole control unit with a minimum rating of 32A and a minimum contact clearance of 3mm, which should be fitted adjacent to (but not above) the cooker, in accordance with IEE regulations.

The power supply cable should conform to BS6004 with a conductor size of 4mm<sup>2</sup>.

The control unit should be easily accessible in the event of an emergency.

This appliance conforms to EN55014 regarding suppression of radio and television interference.

The cooker terminals are behind the cover at the rear. The mains cable must pass through the cable clamp and the screws must be fully tightened. Sufficient cable should be used to allow the cooker to be pulled out for servicing. Ensure that the cover is fully closed and secure afterwards.

Take care not to trap the mains cable when pushing the cooker into its final position.

# INSTALLATION INSTRUCTIONS

## **INSTALLATION AND OPERATIONAL CHECKS**

After installation, check for gas soundness. The supply pressure can be checked at one of the hotplate burner injectors.

Check that the hotplate burners ignite correctly and burn with a steady flame. Check for a steady flame at the low setting.

Instruct the user on the operation of the cooker.

# OVEN TIMER OPERATION

The oven timer offers you the following features:

1. Time of Day
2. Automatic Cooking
3. Minute Minder

## **AUTOMATIC COOKING**

The main oven can be controlled automatically.

## **GUIDANCE ON AUTOMATIC COOKING**

1. Select foods which will take the same time to cook.
2. Set the oven timer so that the food has just finished or is just about to finish cooking on your return to the oven. This will ensure the food has not cooled down and does not require reheating before serving.
3. Food should be as cold as possible when it goes into the oven, ideally straight from the refrigerator. Frozen meat and poultry should be thawed thoroughly before it is put in the oven.
4. Warm food should never be placed in the oven if there is to be a delay period. Stews prepared by frying the meat and vegetables should be cooked as soon as possible.
5. Dishes containing left-over cooked poultry or meat, for example Shepherds Pie, should not be cooked automatically if there is to be a delay period.
6. Stews and joints should be cooked by the long slow method, so that the delay period is kept to a minimum.
7. On warm days, to prevent harmful bacterial growth in certain foods (ie poultry, joints, etc) the delayed start should be kept to a minimum.
8. Wine or beer may ferment and cream may curdle during the delay period, so it is best to add these ingredients just before serving.
9. Foods which discolour should be protected by coating in fat or tossing in water to which lemon juice has been added, prior to placing food in the oven.
10. Dishes containing liquid should not be filled too full to prevent boiling over.
11. Food should be well sealed (but not airtight) in a container to prevent the loss of liquid during cooking. Aluminium foil gives a good seal.
12. Ensure food is cooked thoroughly before serving.

# OVEN TIMER OPERATION

## CLOCKFACE

The timer incorporates a 24 hour clock.

**Ensure the correct time of day is always set, before using your cooker.**

## SYMBOLS

A 'bell' symbol will light up when you select a Minute Minder Period and will remain lit for the period set.

At the end of the Minute Minder Period, the timer will emit an audible tone and the 'bell' symbol will disappear.

The 'cookpot' symbol will light up either:-

- When the timer is in manual mode, or
- During the actual Cook Period.

'AUTO' will light up:-

- When the timer is first turned on it will flash. It will go out when a time of day is set or when the timer is set to manual.

The 'AUTO' symbol will flash at the end of an Auto Cooking programme to indicate that the programme has finished.

***(When the 'AUTO' symbol is flashing, to return the oven to Manual operation, turn the oven controls offs, and press the "Manual" button - The 'AUTO' symbol will go out).***

## TIMER FUNCTION BUTTONS

### Minute Minder Button

Here you can set a time period of up to 23 hours 59 minutes, that will count down. When it reaches zero, the timer will emit an audible tone.

**For Example:** If you set 20 minutes, the audible tone will occur 20 minutes later.

## AUTO COOKING PROGRAMME

### Cook Period Button

Cook Period is the actual length of time for which, the timer will switch the oven(s) on as part of an "Auto Cooking" programme. (e.g. If you set 2 hours, the food will be cooked for 2 hours).

### End Time Button

The time of day at which you want an "Auto Cooking" programme to end.

**For Example:** If you set a "Cook Period" for 2 hours, and "End Time" of 11:00. The timer will switch the oven(s) on at 9:00 and turn the oven(s) off at 11:00. You will hear a audible tone at 11:00, to indicate that the Auto Cooking Programme has finished.

### Notes:

- When setting an Auto Cooking programme you will need to set the oven control(s) to the required temperature(s) when you set the timer.
- If an Auto Cooking programme has been set the oven(s) will only operate during the pre-programmed time.

### Manual Button

Needs to be pressed to cancel an Auto Cooking programme and return the oven(s) to Manual operation.

### "+" and "-" Buttons

Used to adjust the various timer function settings.

# OVEN TIMER OPERATION

## SETTING THE TIME OF DAY

**Step 1** Make sure all oven controls are turned Off.

**Step 2** Check the electricity supply to the cooker is turned on.

**Step 3** When switched on the display will show 0.00 and the Auto symbol, flashing intermittently.

**Step 4** Press & hold in both the Cook Period & End Time buttons together.

**Step 5** With the Cook Period & End Time buttons still held in, press either the "+" or "-" buttons to set the correct time of day.

**Step 6** Release all the buttons simultaneously. THE TIME OF DAY IS NOW SET.

*To change the time of day repeat Steps 4, 5 & 6 above.*

**Note:** You cannot adjust the time of day if the timer has been set for an Auto Cooking Programme.

## SETTING THE MINUTE MINDER

**Step 1** Ensure the time of day is set correctly.

**Step 2** Press and hold the Minute Minder button.

**Step 3** With the Minute Minder button held in, set the required Minute Minder period using the "+" and "-" buttons. A 'bell' symbol will light up.

Release all buttons and the timer display will revert back to the time of day. The 'bell' symbol will remain lit to signify that a Minute Minder period has been set.

At the end of the set time an audible tone will be heard, and the 'bell' symbol will disappear.

**Step 4** To cancel the audible tone press the Minute Minder button.

**Note 1** When the Minute Minder has been set, the time remaining can be checked at any time by simply pressing the Minute Minder button.

**Note 2** If necessary the Minute Minder can be cancelled before the tone sounds by pressing and holding the Minute Minder button and then at the same time pressing the "-" button until 0.00 appears in the display window.

# OVEN TIMER OPERATION

## AUTO COOKING PROGRAMMES

There are two Auto Cooking programmes that can be selected using your timer:-

- (a) To set the timer to switch the oven(s) On and Off Automatically
- (b) To set timer to switch on immediately and OFF automatically after a set cook period.

### a) TO SET THE TIMER TO SWITCH THE OVEN(S) ON AND OFF AUTOMATICALLY

*This allows you to cook at a specified time for a chosen period before the oven switches off Automatically.*

**Step 1** Check that the correct time of day is set, if not follow instructions for setting the time of day.

**Step 2** Place food onto the correct shelf position in the oven and close the oven door(s).

**Step 3** Press and hold in the Cook Period button. The display will read 0.00 with the 'cookpot' symbol lit.

**Step 4** With the Cook Period button still held in, set the required Cook Period using the "+" and "-" buttons.

Release the buttons and the timer display will revert to the time of day with the 'Auto' symbol and 'cookpot' symbol lit.

**Step 5** Press and hold in the End Time button. The display will read the earliest possible end time for the Cook Period that you have set above. The 'Auto' symbol and 'cookpot' symbol will be lit.

**Step 6** With the End Time button still held in, use the "+" and "-" buttons to set the 'End Time' (i.e. The time you require the oven to switch off ). Release all the buttons and the timer will revert back to the time of day.

The 'Auto' symbol will remain lit to signify that an Auto Cooking Programme has been set. The 'cookpot' symbol will go out.

**Step 7** Turn the oven control(s) to the required temperature, and if necessary select the appropriate oven function.

At the end of the Automatic Cook Period the Auto Symbol will flash and an intermittent beeping sound will be heard.

The audible tone will continue unless cancelled.

The 'Auto' symbol will continue to flash until the timer is returned to Manual operation (see below).

**Step 8** Press the Manual button, the audible tone will be cancelled and the oven(s) will be returned to Manual.

**Step 9** Turn the oven control(s) to the OFF position.

# OVEN TIMER OPERATION

**Note 1** When cooking automatically the Cook Period can be checked at any time by simply pressing the Cook Period button.

**Note 2** When cooking automatically the End Time can be checked at any time by simply pressing the End Time button.

## b) TO SET TIMER TO SWITCH ON IMMEDIATELY AND OFF AUTOMATICALLY AFTER A SET COOK PERIOD

**Step 1** Check that the correct time of day is set, if not follow instructions for setting the time of day.

**Step 2** Place food onto the correct shelf position in the oven and close the oven door(s).

**Step 3** Turn the oven control(s) to the required temperature, and if necessary select the appropriate oven function.

**Step 4** Press & hold in the Cook Period button, the display will read 0.00 and the 'cookpot' symbol will light up. With the Cook Period button still held in set the required Cook Period using the "+" and "-" buttons. Example: 1hr 30 minutes (as shown).

**Step 5** Release all buttons.

The timer display will revert to the time of day with the 'Auto' symbol lit & 'cookpot' symbol remaining lit.

NOTE: The Cookpot symbol disappears

At the end of the Cook Period the 'Auto' symbol will flash and an intermittent audible tone will be heard. The audible tone will continue until cancelled. The 'Auto' symbol will continue to flash until the timer is returned to Manual operation (see below).

**Step 6** Press the Manual button. The audible tone will be cancelled and the oven(s) will be returned to Manual.

**Step 7** Turn the oven control(s) to the OFF position.

# OVEN TIMER OPERATION

## TO CANCEL AN AUTO COOKING PROGRAMME BEFORE THE COOK PERIOD HAS FINISHED.

**Step 1** Turn the oven control to the OFF position.

**Step 2** Press the Manual button to return the oven to "Manual" operation. The 'Auto' symbol will go out.

**Note 1** When cooking automatically the Cook Period can be checked at any time by simply pressing the Cook Period button.

### OTHER NOTES ON TIMER OPERATION

1. When cooking Automatically the Cook Period can be checked at any time simply by pressing the Cook Period button.
2. When cooking Automatically the End Time can be checked at any time by simply pressing the End Time button.
3. Having set a Cook Period and End Time an electronic device stores the information. The device within the timer will switch the oven(s) on and off at the required times.
4. When setting an Auto Cooking Programme and a mistake is made, to clear:-
  - (a) Press & release the Manual button.
  - (b) Start the sequence again.
5. If at any time the display shows three flashing zero's 0.00 and 'Auto', it is likely that the electricity supply to the oven has been interrupted. Reset the timer to the correct time of day. **Food in the oven may, therefore, not have been cooked, before serving check food is thoroughly heated and completely cooked.**
6. To set each function always press and hold the required function button and at the same time press "+" or "-" buttons.

# HOTPLATE

The hotplate lid is fitted with a safety device which cuts off the gas supply to the hotplate burners unless the lid is fully open. Do not use the safety device as a means of controlling the hotplate burners.

The hotplate has two high speed burners and two simmering burners which will accommodate pans between 100mm (4") and 240mm (9 1/2") diameter. All pans should be positioned centrally over the burners.

## TO USE THE HOTPLATE

1. Remove any items or spillage from the top of the lid and then raise it to its fully open position.
2. Press the ignition button and then push in and turn the control knob of the chosen burner anti-clockwise to the large flame symbol. Continue to press the ignition button until the sparks light the gas.
3. Turn the control knob anti-clockwise to reduce the heat input. Only turn the control knob between the large flame symbol and the small flame symbol when adjusting the setting.
4. To turn off, turn the control knob fully clockwise to the symbol **O**.

**DO NOT** use the hotplate unless all pan supports are in position.

**DO NOT** use mis-shapen pans which may be unstable.

**DO NOT** use round base woks directly on the pan supports.

**DO NOT** use the glass lid as a working surface.

Each burner is fitted with a spark ignitor for lighting the gas. To ensure rapid lighting of the burners every time they are used, the ignitors must be kept **clean and dry**. Remove any food spillage or cleaning materials from the ignitor using a small nylon brush such as a tooth brush. Access to the ignitor can be achieved by lifting off the loose burner parts carefully when the burners are cool.

When the hotplate burner bodies and caps are removed for cleaning, be careful not to drop any food particles or cleaning materials into the burner bases, to avoid the possibility of blocking the gas jets.

If aluminium based pans are used, a silvery deposit may appear on the top edge of the pan support fingers. See 'Care and Cleaning' section for cleaning information.

## Models with Hob Gas Burner Safety Devices to Prevent Leaks \*

These models can be identified by the presence of the device itself.

**!** Since the hob burners are equipped with a safety device, you must hold the control knob in for about 3-7 seconds after the burner has been lighted to allow the gas to pass until the safety thermocouple has heated.

---

# HOTPLATE

---

## SAFETY REQUIREMENTS FOR DEEP FAT FRYING

1. Never fill chip pans more than one third full with oil or fat.
2. Never leave oil or fat unattended during the heating or cooling period.
3. Never heat fat or fry with a lid on the pan.
4. Always dry food thoroughly before frying, and lower it slowly into the hot oil or fat. Frozen foods in particular will cause frothing and spitting if added too quickly.
5. Always keep the outside of the pan clean and free from streaks of oil or fat.

## HOW TO DEAL WITH A FAT FIRE

1. **Do not** move the pan.
2. Turn off the hotplate burners.
3. Smother the flames with a fire blanket or damp cloth to extinguish the fire. **Do not** use water or a fire extinguisher as the force of it may spread the burning fat or oil over the edge of the pan.
4. Leave the pan for at least 60 minutes before moving it.

# GRILL

**CAUTION - ACCESSIBLE PARTS MAY BECOME HOT WHEN THE GRILL IS USED.  
YOUNG CHILDREN SHOULD BE KEPT AWAY.**

## **GRILLING SHOULD NEVER BE UNDERTAKEN WITH THE GRILL DOOR CLOSED**

The grill control is designed to provide variable heat control of either the full width of the grill or just the left half. Turning the control knob clockwise will switch on the full width and turning anti-clockwise will switch on just the left half.

A gentle flow of air will be blown from underneath the control panel when the grill is in use.

## **GRILL PAN AND HANDLE**

The grill pan handle is detachable from the pan to facilitate cleaning and storage. Fix the pan handle securely before use:

1. Fit the handle to the grill pan so that the external 'hooks' embrace the edge of the pan (fig. 1)
2. Make sure that the middle part of the handle fits exactly the protruding support of the pan (fig. 2) and holds the pan from the bottom.

The food must be placed on the rack in the grill pan.

Position the grill pan on top of the oven rack. The best results are achieved by placing the oven rack on the uppermost shelves. Pouring a little water into the grill pan will make the collection of grease particles more efficient and prevent the formation of smoke.

## **TO USE THE GRILL**

1. Open the grill/top oven door and place the shelf in the required position.
2. Turn the grill control knob clockwise to **4** (or **Max**) for full width grilling or anticlockwise for the half grill.
3. Slide the grill pan toward the back of the grill compartment until it stops.
4. Leave the control at **4** (or **Max**) for toast and for sealing and fast cooking of foods. For thicker foods requiring longer cooking, turn the control to a lower setting after sealing on both sides at **4** (or **Max**).

**NOTE:** The grill will not operate unless the top oven control is in the OFF position.

Grilling can be started from cold but for best results preheat for approximately 2 minutes.

The grill elements are covered by a wire mesh to prevent access to live parts. Under no circumstances should pointed objects be inserted through the mesh.

During use, the mesh may become soiled. Do not attempt to clean it while the grill is on. Turn the cooker off at the control unit and wait until it has cooled down before cleaning.

**DO NOT** cover the grill pan or grid with aluminium foil as this can hold fat, intensify the heat and cause a fire hazard.

# OVENS

Both ovens have a thermostat light that will illuminate until the oven has reached the set temperature. It will then switch off and on during cooking as the thermostat maintains the temperature.

Each shelf has a safety stop to prevent it from being pulled out too far when attending to food. Shelves are removed by pulling them out to the stop and then lifting at the front to withdraw. The oven cooking charts are a guide only, giving approximate cooking temperatures and times. To suit personal taste and requirements it may be necessary to increase or decrease temperatures by 10°C.

After the ovens have been operating for a short period, a gentle flow of air will be blown from underneath the control panel which may continue for a while after the controls have been turned off.

## TOP OVEN - CONVENTIONAL COOKING

The top oven can be used to cook small quantities of food or used in conjunction with the main oven to provide additional cooking space.

### TO USE THE TOP OVEN

1. Place oven shelf in chosen position (refer to cooking chart).
2. Turn the top oven control knob clockwise to the required setting. The top oven thermostat light will go off when the oven has reached the set temperature.

Food should be placed in the centre of the shelf with a gap of at least 25mm (1 inch) between it and the grill element to avoid burning and ensuring an even cooking.

Do not place food or dishes on the floor of the oven.

## MAIN OVEN - FAN COOKING

Fan cooking is ideal for large poultry or joints of meat, reducing cooking times and often eliminating the need for preheating the oven. It is also ideal for batch cooking where food is cooked on more than one level, because the forced circulation of hot air gives an even temperature from the top to the bottom of the oven.

When cooking recipes that are not designed for a fan oven, it is recommended that the temperature is reduced by about 25°C and the time reduced by about 10 minutes for each hour. If a large quantity of food is being cooked, it will be necessary to increase the cooking time to compensate for the extra oven load.

### TO USE THE MAIN OVEN

1. Place oven shelves in chosen position (refer to cooking chart).
2. Turn the main oven control knob clockwise to the required setting. Pre-heating is not normally necessary, but some foods such as bread, scones and Yorkshire pudding do benefit from being placed in a hot oven.

Food should be placed in the centre of each shelf to allow for even air circulation around the food.

**! When inserting the shelf make sure the backstop is at the rear of the cavity (see image)**

# OVEN COOKING CHARTS

	Top Oven Cooking			
Baking	Pre-heat	Temperature °C	Time in mins.	Position in Oven
Scones	Yes	210/220	10-15	Runner 2 from bottom of oven
Small Cakes	Yes	180/190	20-25	Runner 2 from bottom of oven
Victoria Sandwich	Yes	170/180	20-30	Runner 2 from bottom of oven
Sponge Sandwich	Yes	180/190	20-25	Runner 2 from bottom of oven
Swiss Roll	Yes	200/210	10-15	Runner 2 from bottom of oven
Semi-rich Fruit cakes	Yes	150/160	60-75 7 inch	Runner 2 from bottom of oven
Rich Fruit Cakes	Yes	140/150	Depending on size	Runner 1 or 2 from bottom of oven
Shortcrust Pastry	Yes	190/200	Depending on size	Runner 2 from bottom of oven
Puff Pastry	Yes	200/210	Depending on size	Runner 2 from bottom of oven
Yorkshire Pudding	Yes	190/200	30-40	Runner 2 from bottom of oven
Individual Yorkshire Pudding	Yes	200/210	20-30	Runner 2 from bottom of oven
Milk Pudding	Yes	140/150	90-120	Runner 2 from bottom of oven
Baked Custard	Yes	150/160	40-50	Runner 2 from bottom of oven
Bread	Yes	200/210	30-45	Runner 1 from bottom of oven
Meringues	Yes	100	150-180	Runner 2 from bottom of oven

	Fan Oven Cooking			
Baking	Pre-heat	Temperature °C	Time in mins.	Position in Oven
Scones	Yes	210/220	8-10	Runner 2 from bottom of oven
Small Cakes		170/180	15-20	Runner 2 from bottom of oven
Victoria Sandwich		160/170	20-25	Runner 2 from bottom of oven
Sponge Sandwich	Yes	170/190	15-20	Runner 2 from bottom of oven
Swiss Roll	Yes	180/190	10-15	Runner 2 from bottom of oven
Semi-rich Fruit cakes		140/150	60-75	Runner 2 from bottom of oven
Rich Fruit Cakes		130/140	Depending on size	Runner 1 or 2 from bottom of oven
Shortcrust Pastry		190/200	45-50	Runner 2 from bottom of oven
Puff Pastry		190/200	Depending on use	Runner 2 from bottom of oven
Yorkshire Pudding	Yes	180/190	40-45	Runner 2 from bottom of oven
Individual Yorkshire Pudding	Yes	190/200	20-25	Runner 2 from bottom of oven
Milk Pudding		130/140	105-135	Runner 2 from bottom of oven
Baked Custard		140/150	40-50	Runner 2 from bottom of oven
Bread	Yes	200/210	40-50	Runner 1 from bottom of oven
Meringues		80-90	180-240	Runner 2 from bottom of oven

Note: If soft margarine is used for cake making, temperatures recommended by the manufacturers should be followed. Temperatures recommended in this chart refer to cakes made with block margarines or butter only.

# OVEN COOKING CHARTS

Top Oven Cooking				
Meat	Pre-heat	Temperature °C	Time (approx.)	Position in Oven
Beef/ Lamb (slow roasting)	Yes	170/180	35 mins per 450g (1lb) + 35 mins over.	Runner 1 from bottom of oven.
Beef/ Lamb (foil covered)	Yes	190/200	35-40 mins per 450g (1lb)	
Pork (slow roasting)	Yes	170/180	40 mins per 450g (1lb) + 40 mins over	
Pork (foil covered)	Yes	190/200	40 mins per 450g (1lb)	
Veal (slow roasting)	Yes	170/180	40-45 mins per 450g (1lb) + 40 mins over	
Veal (foil covered)	Yes	190/200	40-45 mins per 450g (1lb)	
Poultry/Game (slow roasting)	Yes	170/180	25-30 mins per 450g (1lb) + 25 mins over	
Poultry/Game (foil covered)	Yes	190/200	25-30 mins per 450g (1lb)	
Casserole Cooking	Yes	150	2-2½ hrs	

**If using aluminium foil, never:**  
**1.** Allow foil to touch sides of oven. **2.** Cover oven interior with foil. **3.** Cover shelves with foil.

Fan Oven Cooking			
Meat	Pre-heat	Temperature °C	Time (approx.)
Beef	No	160/180	20-25 mins per 450g (1lb) + 20 mins extra
Lamb	No	160/180	20-30 mins per 450g (1lb) + 25 mins extra
Pork	No	160/180	25-30 mins per 450g (1lb) + 25 mins extra
Veal	No	160/170	25-30 mins per 450g (1lb) + 25 mins extra
Chicken/ Turkey up to 4kg (8lb)	No	160/180	18-20 mins per 450g (1lb) + 20 mins extra
Turkey 4 to 5.5kg (8 to 12lb) over 5.5kg (12lb)	No		13-15 mins per 450g (1lb) at 150/160°C  allow 12 mins per 450g at 150°C
Casserole	No	140-150	1½ - 2 Hrs

**If using aluminium foil, never:** **1.** Allow foil to touch sides of oven. **2.** Cover oven interior with foil. **3.** Cover shelves with foil.

The most accurate method of testing the readiness of joints of meat or whole poultry is to insert a meat thermometer into the thickest part of a joint, or the thickest part of poultry thighs, during the cooking period. The meat thermometer will indicate when the required internal temp has been reached.

**Beef -** Rare: 60°C      **Lamb:** 80°C      **Poultry:** 90°C  
Medium: 70°C      **Pork:** 90°C  
Well Done: 75°C      **Veal:** 75°C

# THE SLOW COOK SETTING

The 'S' setting on the main oven thermostat is used for slow cooking, keeping food warm and warming plates for short periods.

## USING THE 'SLOW COOK' SETTING FOR SLOW COOKING

1. All dishes cooked by the 'S' setting should be cooked for a minimum 6 hours. They will 'hold' at this setting for a further hour but marked deterioration in appearance will be noticed in some cases.
2. Joints of meat and poultry should be cooked at Mk. 6 for 30 minutes before turning to the 'S' setting and never be cooked lower than the middle shelf position.
3. Joints of meat over 6 lbs (2.7kg) and poultry over 4 lbs 8oz (2 kg) should not be cooked using the 'S' setting.
4. Always stand covered joints on a rack over the meat tin to allow good air circulation.
5. A meat thermometer should be used when cooking pork joints and poultry. The internal temperature of the food should reach at least 88°C.
6. This method is unsuitable for stuffed meat and stuffed poultry.
7. Always bring soups, casseroles and liquids to the boil before putting in the oven.
8. Cover casseroles with foil and then the lid to prevent loss of moisture.
9. Always thaw frozen food completely before cooking.
10. Root vegetables will cook better if cut into small pieces.
11. Adjust seasonings and thickenings at the end of the cooking time.
12. Use the zones of heat in the oven, e.g. meringues and milk puddings can be cooked lower in the oven whilst other dishes requiring greater heat can be cooked above them.
13. Egg and fish dishes need only 1-5 hours cooking and should be included in day cooking sessions, when they can be observed from time to time.
14. Dried red kidney beans must be boiled for a minimum of ten minutes after soaking, before inclusion in any dish.

---

# CARE AND CLEANING

---

**! Never use steam cleaners or pressure cleaners on the appliance.**

! Clean the glass part of the oven door using a sponge and a non-abrasive cleaning product, then dry thoroughly with a soft cloth. Do not use rough abrasive material or sharp metal scrapers as these could scratch the surface and cause the glass to crack.

! The accessories can be washed like everyday crockery (even in your dishwasher).

**! Switch off the electricity supply and allow to cool before cleaning the cooker.**

**! Clean the cooker regularly and wipe up spills soon after they occur to prevent them from becoming burnt on. Never use biological washing powder, caustic cleaners, harsh abrasives, scouring pads, steam cleaners, aerosol cleaners or oven chemical cleaners of any kind.**

**! If it is necessary to remove the cooker for cleaning, ensure that it is cool and beware that it is heavy (approximately 70 kg 155 lbs).**

! To move the cooker forward, open the top oven/grill door and with both hands positioned under the roof of the compartment, lift and pull forward. Replace by pushing the cooker backwards.

! Check that the cooker is level. Take care not to damage any floor coverings.

## OVEN HEAT CLEAN LININGS

The oven side linings are coated with a special enamel which has a continuous cleaning action.

The higher the oven temperature the more effective the action. In most cases this cleaning operation will proceed during normal cooking. However, if roasting is done frequently, or high temperatures are not used regularly, it may be necessary to occasionally operate the oven empty at Mark 8 for about an hour.

It should not normally be necessary to clean the linings with water, but if desired, wipe them over with a soapy cloth, followed by a wipe with a damp clean cloth.

## OVEN DOORS

The door inner glass panels can be removed for ease of cleaning by simply sliding the panels out of the frame.

## REPLACEMENT OF OVEN LIGHT BULB

**CAUTION: DISCONNECT THE APPLIANCE FROM THE ELECTRICITY SUPPLY BEFORE REPLACING THE LAMP TO AVOID THE POSSIBILITY OF AN ELECTRIC SHOCK.**

Light bulbs are not covered by the manufacturer's guarantee.

A new 25W, 300°C rated SES bulb can be obtained from your cooker supplier or any major electrical retailer.

1. Remove the shelves from the oven.
2. Unscrew the lens using a thick cloth to protect your fingers in the unlikely event of a lens fracture.
3. Unscrew bulb.
4. Fit new bulb and refit lens.

**! Do not use the oven lamp as/ for ambient lighting.**

# CARE AND CLEANING

COOKER FINISH	CLEANING METHOD
<p><b>Vitreous Enamel</b> Door inner panels, pan supports, burner caps, roasting dish, grill pan, main oven base, inside of grill compartment.</p>	<p>Cloth wrung out in warm soapy water. Stubborn stains can be removed with a cream paste, liquid cleaner or by rubbing with fine steel wool soap pads. Check that the cleaning agent is approved by the Vitreous Enamel Association.</p>
<p><b>Paint</b> Side panels.</p>	<p>Wash with a cloth wrung out in warm soapy water only. <b>DO NOT USE ABRASIVES.</b></p>
<p><b>Aluminium</b> Hotplate burner bodies, lid rear trim.</p>	<p>Similar to paint cleaning above. Use a nylon brush to remove any cleaning materials, water or dirt from the hotplate burner bodies.</p>
<p><b>Glass</b></p>	<p>As for enamel cleaning. Polish with a clean dry cloth or kitchen roll.</p>
<p><b>Chromium Plating</b> Oven shelves, grill pan grid, grill pan handle , grill pan handle support.</p>	<p>Wipe with a cloth wrung out in warm soapy water. A fine steel wool soap pad e.g. Brillo, Ajax, or a chrome or stainless steel cleaner may be used.</p>
<p><b>Plastic</b> Control knobs.</p>	<p>Wipe with a cloth wrung out in warm soapy water.</p>
<p><b>Stainless Steel</b> Hotplate, control panel.</p>	<p>Wipe with a cloth wrung out in warm soapy water. Polish with a clean dry cloth or kitchen towel. For stubborn stains, use a proprietary stainless steel cleaner and follow the instructions on the container.</p>

# SOMETHING WRONG WITH YOUR COOKER

Before contacting your nearest Service Centre/Installer, check the problem guide below; there may be nothing wrong with your cooker.

PROBLEM	CHECK
<p>Burner will not light:</p> <p style="text-align: center;"><i>Hotplate burner:</i></p>  <p style="text-align: center;">Burner ports    Ignitor</p>	<p><u>If all burners fail to ignite:</u> Check that sparks appear at the burners; a clicking noise should be heard. If not;</p> <p>Check that the electricity supply is turned on. If the electricity supply has failed, all burners can be lit by a match.</p> <p><u>If only one burner fails to ignite:</u> Check that the burner is dry and that spillage of food or cleaning fluid remains are not affecting the ignitor or burner ports. Clean away any debris with a dry nylon brush such as an old toothbrush. If a wire wool pad has been used for cleaning around the burner ensure the ignitor is free from any stray strands. Any water on the burner should be dried with a cloth or kitchen towel.</p> <p>Make sure that all the burners parts are correctly seated.</p>

# SOMETHING WRONG WITH YOUR COOKER

PROBLEM	CHECK
<b>Slight odour or small amount of smoke when grill / oven used first time.</b>	This is normal and should cease after a short period.
<b>Oven cooks too fast or too slow.</b>	Check that the oven temperature and shelf positions are as recommended in the Oven Cooking Charts. However, it may be necessary to increase or decrease the recommended setting slightly to suit your taste.
<b>Cannot set an "Auto Cook" programme or cannot get the timer to turn the oven on or off at the required times.</b>	Read the Timer instructions in this book carefully remembering that the Cook period is the length of time that the timer will switch the oven(s) on as part of an Auto Cooking Programme.
<b>Timer Display shows "0:00" with "Auto" Flashing.</b>	The electricity supply to the cooker may have been interrupted, but has now come back on again. set the correct time of day by following the instructions given in the timer section of this book.
<b>Main oven does not work, but the grill, top oven and hotplate burners work.</b>	The timer may be set for an Auto Cooking Programme. Check the timer to see if "AUTO" is illuminated. If it is, follow the instructions given in the timer section of this book to cancel the Auto Cooking Programme.
<b>Oven lamp does not work.</b>	The oven lamp is not covered by the guarantee. The part is easily changed (see the section on oven lamp replacement). A new lamp may be obtained from our Spare Parts department, see Key Contacts (back page).

## Disposal of your product

To minimise the risk of injury to children please dispose of your product carefully and safely. Remove all doors and lids. Remove the mains cable (where fitted) by cutting off flush with the appliance and always ensure that no plug is left in a condition where it could be connected to the electricity supply.

To help the environment, Local Authority instructions should be followed for the disposal of your product.

## Disposal of old electrical appliances

The European Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE), requires that old household electrical appliances must not be disposed of in the normal unsorted municipal waste stream. Old appliances must be collected separately in order to optimise the recovery and recycling of the materials they contain and reduce the impact on human health and the environment.

The crossed out "wheeled bin" symbol on the product reminds you of your obligation, that when you dispose of the appliance it must be separately collected.

Consumers should contact their local authority or retailer for information concerning the correct disposal of their old appliance.

## Guarantee

### 12 months Parts and Labour Guarantee

Your appliance has the benefit of our manufacturer's guarantee, which covers the cost of breakdown repairs for twelve months from the date of purchase.

This gives you the reassurance that if, within that time, your appliance is proven to be defective because of either workmanship or materials, we will, at our discretion, either repair or replace the appliance at no cost to you.

#### The guarantee is subject to the following conditions:

- The appliance has been installed and operated correctly and in accordance with our operating and maintenance instructions.
- The appliance is only used on the electricity or gas supply printed on the rating plate.
- The appliance has been used for normal domestic purposes only.
- The appliance has not been altered, serviced, maintained, dismantled or otherwise interfered with by any person not authorised by us.
- Any repair work must be undertaken by us or our appointed agent.
- Any parts removed during repair work or any appliance that is replaced become our property.
- The appliance is used in the United Kingdom or Republic of Ireland.

#### The guarantee does not cover:

- Damage resulting from transportation, improper use, neglect or interference or as a result of improper installation.
- Replacement of any consumable item or accessory. These include but are not limited to: plugs, cables, batteries, light bulbs, fluorescent tubes and starters, covers and filters.
- Replacement of any removable parts made of glass or plastic.

THE GUARANTEE WILL NOT APPLY IF THE APPLIANCE HAS BEEN USED IN COMMERCIAL OR NON-DOMESTIC PREMISES.

### 5 Year Parts Guarantee

Hotpoint also offers you a FREE 5 year parts guarantee. This additional guarantee is conditional on you registering your appliance with us and the parts being fitted by one of our authorised engineers. There will be a charge for our engineer's time. To activate the extra parts warranty on your appliance, simply call our registration line on **08448 24 24 24 (ROI 01 230 0800)**

### Extended Guarantees

We offer a selection of protection plans that enable you to fully cover yourself against the expense of repair bills for the life of your policy. To find the ideal plan for you please call our advice line on **08448 226 226 (ROI 01 230 0233)**

### Free Helpdesk Service

We have a dedicated team who can provide free advice and assistance with your appliance if you experience any technical difficulties within the first 90 days of ownership.

Simply call our Hotpoint Service Hotline on **08448 224 224 (ROI 0818 313 413)** for telephone assistance, or, where necessary, to arrange for an engineer to call.

## After Sales Service

No one is better placed to care for your Hotpoint appliance during the course of its working life than us - the manufacturer.

## Essential Contact Information

### Hotpoint Service

We are the largest service team in the country offering you access to 400 skilled telephone advisors and 1100 fully qualified engineers on call to ensure you receive fast, reliable, local service.

**UK: 08448 224 224**

**Republic of Ireland: 0818 313 413**

**[www.hotpoint.co.uk](http://www.hotpoint.co.uk)**

**Please note: Our advisors will require the following information:**

Model number

Serial number

### Parts & Accessories

We supply a full range of genuine replacement parts as well as accessory products that protect and hygienically clean your appliance to keep it looking good and functioning efficiently throughout its life.

**UK: 08448 225 225**

**Republic of Ireland: 0818 313 413**

**[www.hotpointservice.co.uk](http://www.hotpointservice.co.uk)**

### Appliance Registration

We want to give you additional benefits of Hotpoint ownership. To activate your FREE 5 year parts guarantee you must register your appliance with us.

**UK 08448 24 24 24**

**Republic of Ireland: 01 230 0800**

**[www.hotpointservice.co.uk](http://www.hotpointservice.co.uk)**

As part of Hotpoint's continued commitment to helping the environment, Hotpoint reserves the right to use quality, recycled components to keep down customer costs and minimise material wastage.
